

CONTENTS

1. REFERENCE NETWORKS	1
1.1. Introduction	1
1.2. Maintenance of EUREF-POL Network	1
1.3. Operational Work of Permanent IGS/EUREF Stations	2
1.4. Active GPS/DGPS Station Network in Poland	4
1.4.1. DGPS/RTK Reference Stations	5
1.4.2. Some Applications of DGPS/RTK Techniques	6
1.5. Vertical Network	7
1.5.1. Re-levelling of the Vertical Control Network in Poland	7
1.5.2. Sea Level Changes	9
1.5.3. Analysis of Levelling Campaigns in Poland	9
1.6. New Gravity Network	9
References	10
2. ADVANCED SPACE TECHNIQUES	13
2.1. Introduction	13
2.2. Satellite Laser Ranging	13
2.3. GPS Permanent Stations	14
2.3.1. Borowa Gora (BOGI) Permanent GPS/GLONASS Station	14
2.3.2. Borowa Gora (BOGO) Permanent GPS Station.....	14
2.3.3. Borowiec (BOR1) GPS Permanent Station	15
2.3.4. Jozefoslaw (JOZE) GPS Permanent Station	15
2.3.5. Jozefoslaw (JOZ2) GPS Permanent Station.....	15
2.3.6. Cracow (KRAW) GPS Permanent Station.....	16
2.3.7. Lamkowko (LAMA) GPS Permanent Station	16
2.3.8. Wroclaw (WROC) GPS Permanent Station	16
2.4. Time Transfer and Comparison	17
2.5. Data Analysis and Orbit Determination	17
2.5.1. SLR Data Analysis	17
2.5.2. Analysis of GRACE Mission Orbits.....	18
2.5.3. Activities of the EUREF WUT Local Analysis Centre	18
2.5.4. Study on Accuracy and Reliability of Precise GPS Positioning.....	20
2.6. Troposphere and Ionosphere Studies	21
2.7. Satellite Gradiometry	23
2.8. GPS Positioning of the Moving Objects.....	23
2.9. Other GPS Applications.....	24
2.10. Research on EGNOS System.....	24
References	24
3. GRAVITY FIELD MODELLING AND GRAVIMETRY	31
3.1. Introduction	31
3.2. Absolute Gravity Determination	31
3.3. National Surveys of Gravity	32
3.4. Investigations of the Non-Tidal Gravity Changes.....	34
3.5. Geoid and Study on the Gravity Field in Poland	34
3.6. Gravity in Applied Surveying.....	35

References	36
4. GENERAL THEORY AND METHODOLOGY	39
4.1. Introduction	39
4.2. Deformation Analysis	39
4.3. Least Squares – Theory and Evaluation	40
4.4. Research on GPS	41
4.5. Research on Gravity.....	42
4.6. Research on Metrology.....	42
References	43
5. GEODYNAMICS	45
5.1. Introduction	45
5.2. Geodynamic Networks in Poland	45
5.2.1. Polish Geodynamic Network	45
5.2.2. Geodynamics Research in the Sudety Mountains and Fore-Sudetic Block (SW Poland)	45
5.2.3. Tatra Mountains Geodynamics	46
5.2.4. Geodynamic Network in Cracow Area	47
5.2.5. Cross-Border Czech-Polish-Slovak Geodynamics Research.....	47
5.2.6. Geodynamic Network in Copper Basin Area	48
5.3. International Geodynamic Networks	48
5.3.1. CERGOP Project	48
5.3.2. Extended SAGET Programme	49
5.4. Earth Rotation	50
5.4.1. Theoretical Problem Related to Modelling and Monitoring Earth Rotation	50
5.4.2. Rotational Variations Due to the Luni-Solar Torque on the Tri-axial Figure of the Earth	50
5.4.3. Regional Atmospheric Angular Momentum and its Impact on Polar Motion	50
5.4.4. Correlation of Seasonal and Sub-seasonal Variations of the Geodetic and Atmospheric Excitation Function of Polar Motion.....	51
5.4.5. Frequency-Dependent Time Lag Between Atmospheric and Geodetic Excitation Functions of Earth Rotation	51
5.4.6. El Niño Impact On Polar Motion Variations	51
5.4.7. Atmospheric and Oceanic Excitation of Earth Rotation	51
5.4.8. Combined Oceanic and Atmospheric Excitation Function of Seasonal and Sub-Seasonal Polar Motion	52
5.4.9. Improvements of Polar Motion Prediction	52
5.4.10. Rapid Oscillations of Polar Motion Determined by GPS	53
5.5. Earth Tide Investigations in Poland in 1999–2002	53
5.5.1. Monitoring of Tidal Signals	53
5.5.2. Improvement of Clinometric Measurement Technique.....	53
5.5.3. Investigation of Tidal Waves Modulation.....	54
5.6. Gravity and GPS for Geodynamics	54
5.7. Secular Variations of the Earth Magnetic Field.....	55
References	55
